# S-parking_CCTV based smart parking
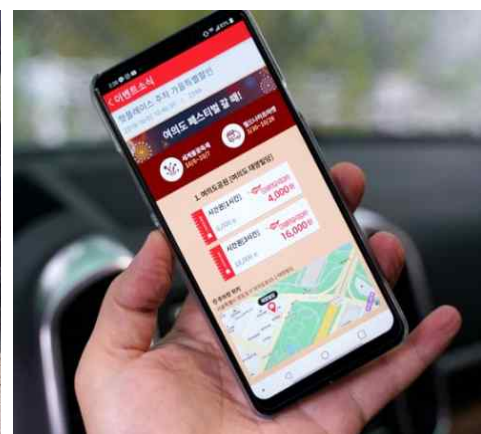

A parking my hand_s parking

✅ Image based analysis

- Image Induction Control System : Not RF Sensor or Geomagnetic Sensor
- Detect License plate and parking status using CCTV

✅ CCTV based smart parking solution

- Quick vehicle location and full car check using AI CCTV SYSTEM
- AI image analysis to solve vehicle count and malfunction using loop sensor
- Image guidance control and abnormal behavior detection for outdoor parking lot

✓ Multi-Object Recognition Platform

- Image based real time parking information recognition technology
  · Intelligent parking status information collection and management system
  · Intelligent parking information recognition module, parking status and location recognition technology
- Multi-object recognition platform technology for Safe City
  · High speed, lightweight multi-object recognition platform technology
  · Edge type deep camera terminal technology

✓ Smart parking application

- Public Parking Lot Parking Space Management System
  · Provide parking status and parking space information using images
- Private and shared parking lots etc...
